

HANDISAN WIPES

Bactericidal hand wipes

HANDISAN WIPES are a hygienic, rapid and simple way of hand sanitising prior to handling food or performing duties where a high degree of cleanliness is a necessity.

ADVANTAGES

Handisan Wipes are impregnated with a denatured alcohol-based hand sanitiser.

Effective quick drying sanitising hand wipes.

Handisan evaporates quickly on the hands and requires no additional drying.

Non perfumed.

Portable resealable container, ideal for field operatives and use where wash facilities are not available.

TYPICAL APPLICATIONS

- Hand sanitisation in food processing environments.
- Ideal for use in the healthcare sector and by nursing homes.
- This product is also effective in all areas where hand hygiene is essential for use by care assistants, domestic staff, police, fire, ambulance and rescue service personnel for protection against crossinfection.
- Handisan Wipes can be used to sanitise probes and food preparation surfaces and other hard surfaces.

APPLICATION INSTRUCTIONS

1. Twist and remove lid.
2. Remove foil seal.
3. Feed first wipe through the hole in the lid.
4. Replace lid.
5. Pull wipe at an angle and tear off at perforations.
6. Wipe over hands or surface and allow to dry.
